

Thesaurus Browser

Fri, 16/05/2008 - 16:39 — webmaster

Thesaurus Browser is a software application that enables the navigation in the electronic version of [Thesaurus](#) [1]. It runs on Windows 98/2000/XP/2003, Mac OS X and Linux x86. Each lemma is accessible through any morphological variation of its headword; lemma searching is robust to misspellings. These features are supported by Neurolingo's [Lemmatizer](#) [2] and [Speller](#) [3]. The following picture demonstrates a snapshot of Thesaurus Browser:

Thesaurus Browser is included in the CD-ROM that accompanies the [Printed Thesaurus](#) [4].
